News of Interest to people in the HVAC and Mechanical fields

Monday, January 26, 2004

International Diversified Marketing Inc. (IDM) www.controlaflow.com will today launch their much-awaited new air filtration system, the Comfort 1st Filtered Diffuser, at the AHR Expo 2004 in Anaheim. This sequel to the popular Control-A-Flow and Breathe Easy devices combines the best features of both into one sleek unit.

The Comfort 1st Filtered Diffuser addresses the two biggest complaints in today's offices, drafts from overhead diffusers and illness and allergic reactions from polluted ductwork. Comfort 1st is the only

Quick Tip

When performing preventive maintenance inspections use "quickie gauges" with short (6") or no hoses. This will reduce the amount of refrigerant lost on each inspection. Of course always check the rubber seal in the cap and replace cap on quick access fittings.

Got a Quick tip you would like to see published here? Email me, the link is on the lower left corner of the page.

CO poisoning

We all have smoke detectors in our residence right? Well unfortunately some people still don't and those who do don't change the batteries. Everyone should have at least two smoke detectors and change the batteries at least twice a year. You, the service tech for the HVAC equipment can at least offer to change the batteries on each seasonal checkup, even if the homeowner will not pay you a few \$'s for the batteries, you have at least jogged their memory.

Enough about smoke detectors, what about CO (Carbon Monoxide) detectors, yes they are available to the homeowner at the local hardware store, but would you as a service tech use a piece of safety equipment that didn't work until the damage was done. No of course not but that's what happening everyday in homes across America. Its time for you the service tech to offer the homeowner the best CO detector available. Visit www.coexperts.com and find out why you should be both using and selling the best detector available.

Please note that I have no association with coexperts.com and have received no financial compensation for this information, it is written solely for educational purposes.
